

Tried the Rest? Now Try the Best!

Choose the Compact, Portable, Scalable, and Universal Safe-T-Rack® System

Is your heavy, clumsy, land-based remote racking system sitting in a corner, collecting dust? Your operators won't use it because it's too difficult to maneuver, and too difficult to adjust the settings? Have you watched your remote racking system held on by magnets slide off the door during the racking process? Does it take three hands to align your system and engage the magnets?

It's time you tried the simple-to-use, patented Safe-T-Rack® solution from Remote Solutions, LLC.

"Our staff usually finds something to not like. Their comment was 'You guys actually bought something that we like.'"

- LEADING ENERGY SUPPLIER

"Safe-T-Rack is easy to install and use. It took less time to mount the system than wheel in our existing racking device."

- MAJOR STEEL MILL

"Integration, commissioning and training were all simple and painless."

- LARGE ELECTRICAL UTILITY

Safe-T-Rack is the right choice for a wide range of industries, including power utilities, mining, petrochemicals, transportation, and more. It is compatible with low and medium voltage switchgear, and mitigates arc flash hazards per NFPA 70E with a working distance up to 150 feet.

Distance is the Best Arc Flash Protection™
