SAFE-T-RACK
by remote solutions, llc

Safe-T-Rack®
SRN Remote Racking Bypass Device

Application Summary

Functions/Features

- Install round 14 pin plug in door mounted receptacle

- Mount "local" motor on platform

- Apply cable harness by installing the 8 pin plug into the J-Box receptacle and mate the 4 pole receptacle with the 4 pin plug on the 'local" motor

- Select direction of breaker travel by using the motor mounted toggle switch "raise" or "lower"

- Pull slide clutch handle forward to engage the slide clutch with motor coupling simultaneously starting the motor

- Motor will function as per original switchgear racking design
