

WIRELESS REMOTE LINEAR OPERATOR

OPERATE MCCS AND MOLDED CASE BREAKERS FROM A SAFE DISTANCE

Safe-T-Flex© Flip magnetically attaches to available surfaces, allowing a user to place the device anywhere it is convenient. Adjustable support arms align the assembly with equipment, adapting for multiple switch sizes. A sturdy toggle operates the lever by traveling along the support bar.

Using a wireless controller, a user performs linear tasks remotely - without requiring permanent alterations to cubicles and equipment!

OPERATE SWITCHES REMOTELY
